

## STOCKINGER FOR BENTLEY – LIMITED EDITION

### TRADITION AND TECHNOLOGY IN ABSOLUTE HARMONY

Dedicated to design, engineering and craftsmanship. Created in honour of the Bentley vision. The new edition “Stockinger for Bentley” exhibits sleek luxury in design and polished perfection in technology. Like the famous namesake, it combines secure technology with designer looks. As a Bentley is unmistakable, so too is a Stockinger safe. Hallmarks of luxury such as the leather linings and the brushed aluminium interior finish unite with the seven layer lacquer and design elements typical of Bentley interiors to create its exciting beauty. The “Stockinger for Bentley” will be limited to 400 safes for the two models, the “Arnage” and the “Continental”.

### DESIGN AND FINISH

Every single Stockinger safe is a unique and bespoke masterpiece. The surface of each piece is carefully and conscientiously primed, painted and sanded off during an 18-stage process of manufacture. This process takes several weeks and is completed with a finish of the finest carnauba wax, which produces a softer look and lends an unusual optical depth to the paint. The safe is available in all standard Bentley exterior colours, 10 Stockinger interior suedes and 3 wood veneer panels. This gives the customers an almost infinite number of combinations for commissioning just the look they desire.

The Bentley handle itself weighs 3,5 kilograms and has been milled in a 16-hour process from a single block of brass. In four more refining steps, the grip has been sanded, polished, chromed and lacquered to provide the jewel-like finish. Complete with the Bentley “B” at the centre of the handle, the “Stockinger for Bentley” provides the ideal, secure environment for your valuables.

### TIMELESS INTERIEUR – THE ARNAGE

For devotees of fine mechanisms, the “Arnage” is an elaborate watch safe equipped with state-of-the-art watch winders for exceptional timepieces. For more than 20 years we have been integrating watch winder technology into safes. Watch collectors all over the world use our reliable devices. The watch winders run almost noiselessly, an extremely long, disturbance and maintenance free life is guaranteed. The design captures traditional craftsmanship qualities and techniques and reveals design cues we are passionate about. The choice of materials demonstrates the high quality and finishing evident in every Stockinger safe.

## **DEDICATION TO DETAILS – THE CONTINENTAL**

The finish on the drawers and on the safe door is identical to the Bentley dashboard texture, known as engine turning. Engine turning is a labour-intensive process associated with high quality luxury items and is traditionally found on the racing cockpit interior of one of Bentley's earliest cars, the Bentley Blower. For the first time, the engine turning technique has been applied to the interior of a safe. The "Continental" with its 6 different trays, provides the ultimate storage solution for jewellery. Whether it be large or small rings, brooches, earrings, wide or narrow necklaces, chokers, cufflinks and bangles, customers will be able to present their jewellery at home in the style they are accustomed to.

Around 30 different teams of experts, from engineers and technicians to craftsmen and artists, are involved in the manufacture of a Stockinger safe.

## **STOCKINGER SAFETY FIRST CLASS GMBH**

Stockinger Safety First Class GmbH has been producing unique safes and security systems in Neuried near Munich for 30 years. Stockinger understands that good design is as important as best practice from a safety-related and technical point of view. Thus research, technical development, construction and design are equal components in the fabrication of each safe.
