

## STOCKINGER SAFE HYAS

### FOR DEVOTEES OF FINE MECHANISMS

In addition to the Bespoke Line and the “Stockinger for Bentley” Line, the Safe HYAS is specifically designed for watch collectors. It enables enthusiasts to keep, present and organize an extensive collection securely and professionally in their personal environment. The five separate watch winding units, each with four winders, can be individually configured. For more than 20 years we have been integrating watch winder technology into safes. Watch collectors all over the world use our reliable devices. Our watch winder runs almost noiselessly. An extremely long, disturbance and maintenance free life is guaranteed.

The drawers can store a maximum of 188 watches or can be customized for jewellery. Every safe is created with unparalleled fit and finish from the inside out with the highest quality hand-crafted materials for interiors and drawers that can be produced from an astonishing range of materials. The same attention to detail is taken into consideration with the exteriors. Our design approach fuses the elegance of fine furniture creation with a security level protection equivalent to that of a commercial bank vault

Around 30 different teams of experts, from engineers and technicians to craftsmen and artists, are involved in the manufacture of a Stockinger safe.

### STOCKINGER SAFETY FIRST CLASS GMBH

Stockinger Safety First Class GmbH has been producing unique safes and security systems in Neuried near Munich for 30 years. Stockinger understands that good design is as important as best practice from a safety-related and technical point of view. Thus research, technical development, construction and design are equal components in the fabrication of each safe.
