SOLID SAFETY FOR UNCERTAIN TIMES

A Stockinger safe is more than maximum security and protection - it elegantly blends function and form with individuality and security at uncompromising levels of quality for your most valued possessions. Stockinger safes fit seamlessly into any classy environment, offering highly customized levels of protection without sacrificing grace or style.

Stockinger safes are also created to realize your individual design wishes. We produce precisely the safe that will fulfill your individual needs for security and meet your aesthetic standards.

DIMENSIONS OF THE MODEL ISIS

BESPOKE SAFETY

Starting with a technically most advanced safe „shell“ we spend as long as it takes planning, creating and fitting a safe that suits individual requirements.

We provide internal self-winding watch mechanisms that keep automatic watches in first-rate condition no matter how long they are locked away.

Every single component, as well as the finished product, is subjected to stringent quality controls. Each safe is individually numbered and is one-of-a-kind.

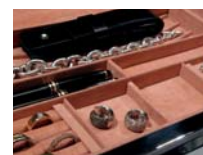

STOCKINGER SAFE HYAS 20V

STOCKINGER for BENTLEY

„Stockinger Safes combine security, creativity and German craftsmanship to create exclusive bespoke safes for you as a discerning collector of high quality jewellery, timepieces and other valuables.“

Dominik von Ribbentrop, CEO

EXAMPLES OF BESPOKE JEWELLERY TRAYS

WHAT MAKES A STOCKINGER SAFE SO UNIQUE?

TECHNOLOGY

Stockinger safes have a multi-wall safe construction, which allows the lightest possible weight combined with a maximum security level. The bolt mechanism locks the safe on all four sides. No Stockinger safe has ever been broken into.

SECURITY

Stockinger safes comply with the very strict EU norm EN 1143/1. Stockinger safes carry the high rating of VDS III and VDS IV and thus meet the highest demands of German and international insurance companies.

CUSTOMIZATION

We believe in bespoke solutions and are driven to create and manufacture the perfect safe for your individual demands. Whether it is watches you need to wind, a collection of jewellery, documents, coins, cash, stamps, a Stockinger will secure them all.

VARIABILITY

Five different sizes (from 60 liter volume to 520 liter with up to 20 drawers) will satisfy all your spatial demands you place on your individual safe.

LACQUER

Each safe surface is carefully primed, painted, sanded and repeatedly repainted up to 18 times, a process requiring several weeks. Finest carnauba wax makes the shape look softly rounded and gives it lively reflections and an unusual optical depth of the paint.

SILENT ALARM

Our Stocktronic keypad system is equipped to trigger a "silent alarm" to your security company in threatening situations for you to feel secure and outsmart any burglar.

STOCKTRONIC

The concealed keypad of the patented Stocktronic locking system guarantees security and extraordinary ease of use. It can be connected to any alarm system.

SOLID BRASS HANDLE

Stockinger safes feature a solid brass handle, which is comfortable to hold and open, resisting signs of wear due to the use of an 18 carat gold or chrome plating.

WATCH WINDER TECHNOLOGY

Our watch winders will keep your automatic watches ticking away in a secure, made-to-measure storage space. This is the ultimate care for your automatic watches.

GLASS PLATE PROTECTION

If an attempt to open a Stockinger safe by force is made, an emergency bolt mechanism will firmly and permanently lock the safe.

JEWELLERY SOLUTIONS

We will build made-to-measure jewellery trays out of the finest Alcantara material which will show no chemical reaction with Gold or Silver. Every piece of your jewellery will get its own bespoke compartment.

BATTERY POWERED

A Stockinger safe works independently from outside power supply due to a built-in battery system.

CORUNDUM

The safe's walls are composed of ultra-hard special high-tech polymer plating which is up to six times harder than standard platings.

TRADITION

At Stockinger, we are committed to the tradition of the locksmith profession. We regard our craftsmanship as a gesture of appreciation to what is beautiful and valuable.

CRAFTSMANSHIP

More than 30 different experts and craftsmen are involved in the manufacture of a Stockinger safe. All our components are manufactured in Germany or Switzerland.

STOCKINGER for BENTLEY

Matching manufacturing philosophies and sophisticated demands on product quality let Bentley choose Stockinger as the manufacturer of the one and only Stockinger for Bentley safe.

QUALITY

All our safes are subject to rigorous quality control procedures. In combination with our strict guidelines for production it ensures the highest standards of reliability for every Stockinger.

HOW TO ORDER YOUR PERSONAL STOCKINGER SAFE.

You will probably only buy a safe once in your life. It should therefore be the best and most secure available. There are two ways to order a Stockinger safe. Either you pick a fully manufactured and „ready-to-deliver” safe or you specify your own personal Stockinger safe.

1) SAFES IN STOCK

We always carry a certain number of fully equipped safes in stock which can be acquired and delivered immediately.

Please visit our website: www.stockinger.com.

2) YOUR BESPOKE STOCKINGER SAFE

Creating your own personal bespoke Stockinger safe is like specifying a car. This process is done in four steps:

1. Answer all questions of the „Customization Questionnaire“ (.pdf on our website) and/or call us for personal advice.
2. Using this information we create a personalized computer image of your bespoke safe. Once we receive your confirmation your safes goes into production.
3. Building your safes takes between 6 and 12 weeks. We inform you on its progress.
4. Delivery and installation will be arranged shortly thereafter. We ship and deliver our safes worldwide.

ENJOY THE GOOD FEELING

We guarantee perfect production of a first class safe that will give you peace of mind for many years to come. A Stockinger safe will make you realize that you have done the best for your valuables. Enjoy this good feeling every day of the year and enjoy your most precious possessions without being inconvenienced by bank opening hours and the need to plan well in advance to have access to your valuables.

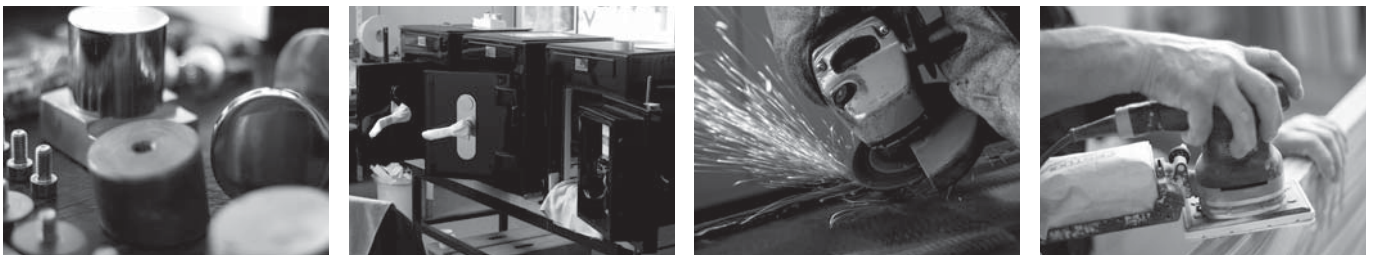

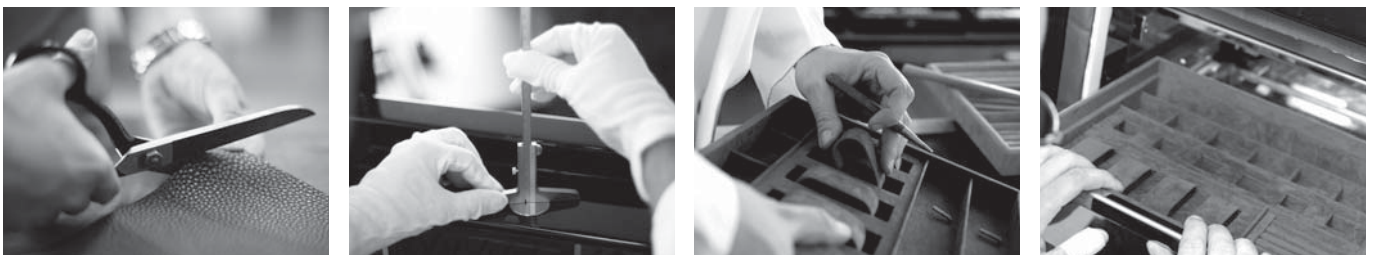

MANUFACTURE. UNIQUENESS. QUALITY.

More than 30 different teams of experts are involved in the manufacture of a Stockinger safe. Engineers, technicians, craftsmen and artists, all with many years of experience. We regard our craftsmanship as a tribute to what is beautiful and valuable, and we believe as much care should go into making a safe as the objects it contains.

Our security concept combines experience, unique insight and the latest security technology. With their unique construction, special barrier materials, double boltwork and the patented Stocktronic keypad system, Stockinger safes fulfil the highest demands of any insurance company.
