

# BRABUS SV12 Safe by Stockinger

*Dynamic and elegant finish – stylish and exquisite interior*

*The two noble German factories, BRABUS and Stockinger, have jointly created and manufactured the most extravagant and spectacular high security safe.*

*The safe „BRABUS SV12“ combines elements of sporty (dynamic) luxury with ultimate security in visual, functional and technological perfection to attract a special range of clients who appreciate and seek the extraordinary. This safe, created for the most demanding jewelry and watch collectors, forms a bridge between the best traditions of safety technologies and design-oriented look. The „BRABUS SV12“ safe will be introduced for the first time at the IAA fair in Frankfurt on September 13-25, 2011 (at the BRABUS stand in Hall 5, stand B27).*

*Hallmarks of luxurious extravagance such as finest leather linings quilted in red yarn in combination with carbon and chrome elements, multi-layer black high-gloss finish and reminiscences of the BRABUS factory design language add up in characteristically fascinating aesthetic appearance of the BRABUS safe SV12 by Stockinger. Number „12“ in the name of the safe originates from the powerful BRABUS 800 SV12 engines, but in this case it stands for twelve built-in watch winder devices for ideal maintenance of automatic watches.*

*The BRABUS SV12 safe with its usable space volume of 183 liters and exterior dimensions of 127 cm x 67 cm x 55 cm (H x B x T) was developed primarily for private use. Easy and safe to handle by means of the automatic digital input system Stocktronic® installed at an ergonomically correct height, this safe is ideal for use in private homes, which gives its owner the freedom to enjoy his valuables at any time of night and day within his own four walls.*

*The BRABUS SV12 safe permits to keep beautiful and valuable objects in a suitable environment, „rescuing“ them from a dull existence within in-wall lockers, basement hide-aways and bank vaults. The common strategy of „hide and seek“ is herewith replaced by complete “invincibility“ that prevents destruction of property typically caused by search for valuables in case of burglary.*

### **Company background information**

*For over 30 years Stockinger Safety First Class GmbH, situated in a small town of Neuried close to Munich, has been manufacturing unique safes and safety systems.*

*Stockinger safes and safety systems are the only ones worldwide to combine maximum security with appealing aesthetics. Each Stockinger safe is individually customized. In particular the number of drawers, their size and material (brass, chrome or wood), number of watch winders and special trays for jewelry and watches, lining for drawers and trays (Acantara, velvet or leather) and other criteria such as engravings and interior lighting are manufactured in accordance with the customer's choice.*

*Dominik von Ribbentrop has been the owner and General Manager of the company since 2003.*

*You will find further information and pictures for download under [www.stockinger.com](http://www.stockinger.com).*
